Note: Each paper must have its own certificate and the *Express Mail* label number as a part thereof or attached thereto. When, as here, the certification is presented on a separate sheet, that sheet must (1) be signed and (2) fully identified and be securely attached to the paper or fee it accompanies. Identification should include the serial number and filing date of the application; as well as, the type of paper being filed, e.g., complete application, specification and drawings, responses to rejection or refusal, notice of appeal, etc. If the serial number of the application is not known, the identification should include at least the name of the inventor(s) and the title of the invention.

Note: The label number need not be placed on each page. It should, however, be placed on the first page of each separate document; such as, a new application, amendment, assignment, and transmittal letter for a fee; along with, the certificate of mailing by *Express Mail*. Although the label number may be on checks, such a practice is not required. In order not to deface formal drawings, it is suggested that the label number be placed on the back of each formal drawing or the drawings be accompanied by a set of informal drawings on which the label number is placed.
